Alternative Parallel Taxi Routing TWY C3 - New Sorting & Intersection Markings

Munich Airport has developed a new concept for taxilane intersection markings of the orange / blue lines in context of Alternative Parallel Taxi Routing [APTR]. The new dashed markings are now also installed at Taxiway C3. The sorting of the markings between blue and orange has changed as well in order to avoid confusion:

New Markings at TWY C3:

- orange, yellow & blue lines are merging at W1 / E1
- Now, TWY C3 orange is in the north, while TWY C3 blue is in the south (clearing transitions)
- Alternating dashed lines indicate the transition from one coloured taxiway into another coloured taxiway
- Dashed lines always start with the colour of the target line

Your feedback is much desired!

In case you have been using this intersection, please provide your feedback regarding the new markings to Airport Safety. Use the QR code to send us an email [safety@munich-airport.de].

- Are these new markings clear to you?
- Are the markings an improvement for your operations while taxiing?
